

CLAIMS

What is claimed is:

- 5 1. A pointing device comprising:
a housing;
a displacement signal generator installed in the housing
for generating displacement signals; and
an input panel installed on the housing for inputting image
10 data;
wherein the image data inputted to the input panel will
be transmitted to a computer to perform an
identification process.
- 15 2. The pointing device of claim 1 being a mouse.
3. The pointing device of claim 2 wherein the displacement
signal generator comprises a roller installed at bottom
of the housing for generating displacement signals.
- 20 4. The pointing device of claim 1 wherein the displacement
signal generator comprises a track ball installed at a top
end of the housing for generating displacement signals.
- 25 5. The pointing device of claim 1 further comprising a button
installed on the housing for generating button signals.
